

Boost Energy Savings with an Innovative, Variable Speed Pump Solution

Genius V

Vertical Multi-Stage VFD Booster

Our Genius V series is a highly compact, vertical multi-stage, customizable package. With vertical diffuser pumps in a variety of configurations that allow for low-flow, high-pressure boosting, this series has the most intelligent technology in the plumbing industry. Designed as a multi-stage stacked pump with enclosed panel-mounted frequency drives, the Genius V will meet your pump system needs.

All Genius V systems come complete with our award-winning variable speed pressure control software iQFlo™, with GreenFlo™

ASHRAE/ANSI/IES Standard 90.1 compliant low-flow energy optimization algorithm.

Discover More Genius V Features and Benefits:

- Competitively Priced for Bid and Spec Projects
- 304 Stainless Steel Frame and Headers
- Glycerin-Filled Suction/Discharge Gauges
- 256 Color Touch Screen with Alarm Log File
- Compact Design (Most Fit Through a 36" Doorway)
- Long Service Life and Simple to Maintain
- ASHRAE 90.1 Compliance with Logic – No Remote Sensors Needed
- 304 Stainless Steel Multi-Stage, High-Head Pumps
- Grooved-End or Flanged-End Connections
- Variable Speed Drive Control – No PRV's
- Factory-Tested and Pre-Set to Site Conditions
