

[Take Control with Our Low-Noise Variable Speed Pump Solution]

WisperFlo™

Ultra-Quiet Submersible Multi-Stage Series

Our flagship packaged pump product line, the WisperFlo series is a submersible multi-stage, multi-configurable turbine pump that is actually contained inside the system piping. This design enables it to take advantage of the sound-subduing quality of water to virtually eliminate all motor and pump noise. It's so quiet, in fact, if you weren't aware you were using such an intelligent system, you could forget you even have it.

All systems come complete with our award-winning variable speed pressure control software iQFlo™, with GreenFlo™

ASHRAE/ANSI/IES Standard 90.1 compliant low-flow energy optimization algorithm.

Explore More WisperFlo Features and Benefits:

- 304 Stainless Steel Frame and Headers
- Glycerin-Filled Suction /Discharge Gauges
- 256 Color Touch Screen with Alarm Log File
- Compact Design (Most Fit Through a 36" Doorway)
- Whisper-Quiet Operation for Noise Sensitive Areas
- ASHRAE 90.1 Compliance with Logic – No Remote Sensors Needed
- 304 Stainless Steel Submersible Turbine Pumps
- Grooved-End or Flanged-End Connections
- Variable Speed Drive Control – No PRV's
- Factory Tested and Pre-Set to Site Conditions
- Long Service Life and Simple to Maintain

QuantumFlo™
an exponential leap in pump technology
