

[**Booster System Sizing Can Be Difficult. That's Why There's calQflo.**]

The World's Most Precise Pump Sizing and Selection Tool

Intelligent Sizing Software

The most efficient online booster pump system sizing and selector software, calQflo is a free and revolutionary online tool that matches your project specs to the best system selections and solutions for your needs, bringing you **revolutionary efficiency and excellent ROI**.

Energy-Efficient Solutions

calQflo calculates the Total Water Fixture Units (WFU) for a booster system by matching the project's property data with a rich set of parameters from the ASPE handbook and Hunter's Curve computation.

You enter your project specs into the calQflo online portal.

calQflo recommends system selections, based upon your needs.

Your system runs long into the future with maximum cost savings.

Ensures 20-50% Potential Energy Savings

Benefits Include

- 100% Control and Spec Guarantee
- Auto-Redundancy Calculator
- CAD Drawing Library
- calQflo selection
- Easy-to-use
- Energy Saving Calculators
- Intuitive kWh Calculations
- Lighting Fast Submittal Creation
- Mobile-Friendly
- Product Longevity

calQflo delivers complete, cost-effective solutions for:

Plumbing

**Water Harvesting
& Reclamation**

HVAC Packages

Controllers

Calculate Anytime, Anywhere

Sizing for Your System Has Never Been Easier.
