

Boost Energy Savings with an Innovative, Variable Speed Pump Solution

[Genius V Series]

Vertical Multi-Stage VFD Booster

Our Genius V series includes the most intelligent technology for plumbing applications, designed to control low flow-high boost conditions. Genius V systems are highly compact, featuring multi-stage stacked pumps and enclosed panel-mounted variable frequency drives.

All Genius V systems come complete with our award-winning variable speed pressure control software iQFlo™, with GreenFlo™ ASHRAE/ANSI/IES Standard 90.1 compliant low-flow energy optimization algorithm.

[Discover More Genius V Features and Benefits]

- Competitively Priced for Bid and Spec Projects
- 304 Stainless Steel Frame and Headers
- Glycerin-Filled Suction/Discharge Gauges
- 256 Color Touch Screen with Alarm Log File
- Compact Design (Most Fit Through a 36" Doorway)
- Long Service Life and Simple to Maintain
- ASHRAE 90.1 Compliance with Logic – No Remote Sensors Needed
- 304 S.S. Multi-Stage, High-Head Pumps
- Grooved-End or Flanged-End Connections
- Variable Speed Drive Control – NO PRV's
- Factory-Tested and Pre-Set to Site Conditions
